

19 de abril del 2018  
FOR IMMEDIATE READING

Based on what has happened in the SECURITY COUNCIL, SOCHUM, DISEC and ECOSOC, the representatives of the Organization for the Liberation of Palestine, the protectors of the palestinian community. Its completely grateful with all that nations that have understand our motives and intentions, **nations like China that support our principles and our reasons to be recognize. Or Iran that have support this fight since it begins, and now they are been theath by the USA and its possible invasion to the Strait of Hormuz.**

But, we, do not understand how countries such as the **USA, France, Germany** are against us, they are against freedom, rights and life. But after turning its back on the Palestinian people for years, now they **send troops and military equipment to Israel to protect them,** to protect a corrupt state a state that must be eliminated from the planet. **Countries like these must be destroyed,** countries that arrive, violate the sovereignty imposed their governments and then try to eradicate its own creation. Added to this is the United Kingdom, that since 1940 has invaded Africa or France, which imposes its traditions, bringing chaos and then leaves our people submerged in terror. **All this represent the inefficiency of the International Community and its actual plan.** Delegates you have discuss for more than a day and what you decide is to **abandon other countries, separate from the agreement against terrorism, close borders and put sanctions, as if this would stop what is really happening. Every time you attack us with your drones, puts regulations on the sale and purchase of weapons or creates funds for the alleged financing of peace, it only makes our hatred for you increase.**

Also, we would like to communicate that **Hezbollah group has insurgency in the state of Israel and if any nation decide to attack, they would attack too.** But we would like to said that the current focus on the "light footprint" against "terrorism" is **a combination of drone attacks with precision and attacks by special forces that can kill the "fundamental" leadership but there was never behind an articulated theory, causing the threats and the tactics produce became more dangerous.** The resolutions for the regulation of arms production or the international cooperation plans to create tactics just fail, why? Because **we don't depend on black market, we have our own sponsorships, and our own business like: kidnappings, common robberies, drug sales, or also the Countries support: regular arms sales between governments. Without strict controls at the receiving end, weapons may disappear from state arsenals and appear in the hands of others.** On the other hand, we make a call to the countries and to remember we have been the only ones that we try to improve the basic social problems of nations that are without a government.

All of this motives make us take more extremist decisions, reason why we would start by being present at the **extraordinary meeting in the World Bank,** this meeting have take place yesterday (18 of april 2018), and **sanctions to USA have been present by nations**

such as China but would this really fix something? No. **The reaction of USA, get away from the actual counter terrorism plan, he have decided to turn his back on others only for their interests and has corrupted nations like Turkey, France and the UK to join them,** as if this would help. **The disunion that the international community has show make us be stronger and that Allah is helping us. The US proposal to create a new plan with its allies is a inefficiency idea.** You need each other, if this plan is created it will only help us to enter your countries more easily. Now in the 21st century neither US nor UK are immune to terrorism on their borders, and if this is the case with the assistance of the international community who would be with the support of only one party. **By supporting this “solution” they are only signing their own defeat.** This is why for us as an Arab community we call Turkey, so it does not allow itself to be corrupted by oppressive nations and instead join the other sister countries that seek good. But also **this countries are forgetting the pact each you made when becoming member of the United Nations,** as it is said in the United Nations Chapter "the member states will unite our forces for the maintenance of international peace and security" and "to use an international mechanism to promote the economic and social progress of all peoples" or like the article 3 said "Carry out **international cooperation** in the solution of international economic, social, cultural or humanitarian problems, and in the development and **encouragement of respect for human rights and fundamental freedoms for all,** without distinction based on race, sex, language or religion". **In this case this countries (USA, UK,France, Turkey) are violating what for you is a pillar to achieve peace and one of the pillars of the UN.** Then we are ready to achieve peace and freedom to our people, now, is the international community prepared for this?

Regarding the discussion of what social conditions makes people enter terrorism as a way to live in a modernized country, there have been different riots and uprisings through the middle east **as a way for people to make themselves be taken into account by the international community, as an attempt to be helped, but also, be part of a solution.** This riots are being present in countries such as Iran, Israel, Sudan and Syria. But also, in countries such as China and Russia, **the religious minorities are also protesting and revolting in order to be recognized by the community.** Likewise, the international community feels frightened that this different insurgencies can have a bigger yet deeper impact on the development of the committees.

The idea that **religion and ethics are the bases of terrorism** have create questions like **how do we prevent young Muslims from radicalizing? But it is a tricky question because it points them in the wrong direction.** Why? Because it contains a hidden assumption that radical ideas, specifically Islamic theological ideas, are the main cause of turning a boy into a terrorist. According to **the hypothesis of radicalization created by the international community, it is the conservative Islam and the dangerous ideas contained in the Koran that motivate the homicidal behavior.** This is as convincing as arguing that the murderous parts of the Bible were responsible for the brutality of the IRA. This is why **countries should recognize that the Koran as well as the Bible have passages that are deeply immoral. But not entirely the reasons that lead to these actions.** Because this is not how or why people go to Iraq to become "murderous criminals". **They go, in large part, because they believe that their people are being attacked, that**

Bashar al-Assad is spilling gaseous chlorine, that the West invaded Iraq, because of torture and Guantánamo Bay, and because there is **a sense of responding to all this**. Reason why ideas such as programs to promote dialogue, tolerance and understanding among civilizations, cultures, peoples and religions, and to promote mutual respect for and prevent the defamation of religions, religious values, beliefs and cultures. or how do you call is the **Alliance of Civilizations is a complete joke**, this programs would not succeed if the international population continue to think islam is bad or is the guilty. Also the idea of to promote a culture of peace, justice and human development by establishing and encouraging, as appropriate, education and public awareness programs involving all sectors of society is as **useless as your current plan to stop terrorism**.

So delegates, rember **union make the force**, we are a union, but are you?

Representatives of the Organization for the Liberation of Palestine.
