East Jerusalem, Palestine
Allahu Akbar

Today in the in the United Nations complex located in Vienna, Austria, we, the Organization for the Liberation of Palestine (PLO) guided by our principles of the destruction of the State of Israel and the right of self-determination of the Palestinian people have carried out an attack of incalculable proportions around 2.640 deads and more than 4.050 wounded not counting the destruction of almost all of the surroundings of the UN building. The Popular Front for the Liberation of Palestine recognized by the Palestine Liberation Organization as the one in charge of carrying out these acts for the independence of our people, has carried them with total success.

Today begins a new era for the Palestinian people and the world, an era where we will no longer be oppressed, where the world will realize the damage they have done to us, how they had bleeding this people. The time has arrive, the time in which those that have gave us their back suffered the same oppression, felt the same fear and live the same things that we lived for more than 54 years.

We are aware of the peace treaty carried out with the Israeli government in 1993 in which proposals were made for the protection of both populations. But this proposals have turned out to be a scam, proposals that have only brought the submission and abuses by the Israeli government to our palestinian people, agreements that with the support of the International Community had only hold imperialism and power to the State of Israel to keep the Palestinian people in the atrocious situation that they suffer today. Nowadays, guided by false accusations large operations of control to the Palestinian population have been carried out by the Israeli forces, who have also marched over Palestinian cities and towns, destroying everything in its path, destroying houses, hitting children, arresting massively until the point that more than 400 arrests and thousands of requisitions in one day.

The United Nations has been corrupt, has forget all that things that at first were the pillars of this organization, the International Community have forget the reasons why they must fight and what they most defend. Today, the Popular Front for the Liberation of Palestine is considered a "belligerent" group by nations such as the United States of America, Canada and the European Union and have became a target for the International Community, to the point of implementing in the zone the UNITED NATIONS GLOBAL STRATEGY AGAINST TERRORISM, a plan that among the years has failed because of its insufficiency to counteract and confront those "belligerent" groups, nowadays, we and many other groups do not depend on state sponsorship, now, we are non state actors which have bring us the advantage of porous borders and interconnected international systems (finance, communications, and transit). Now, we can reach every corner of the globe. In the ages we live now, non Europe, non the United States are immune from terrorism within their borders.

The lack of a universal agreement over what constitutes terrorism weakens efforts to formulate a concerted global response and the inadequate compliance and enforcement of existing instruments shows the inefficiency of the international community in their attempt to create a plan to eradicate us. The international community has fought in complete disunity on the contrary that its adversaries that we are united by a common goal, instead you generate a tolerance for terrorism when we attack one of

your rivals and do nothing. We must add that your actual plans lack of ways to eradicate new threats that emerge every day. The inefficiency the international community “to resolve protracted conflicts and prevent new ones; the military interventions; the disregard for international law, including human rights and international humanitarian law and the rising inequality between and within States”(Seventieth session,The United Nations Global Counter-Terrorism Strategy,Report of the Secretary-General) have make us be more strong.

We, are a real example of what an interconnected community should look and be like, all guided by our supreme leader Yasir Arafat and consist of: the Popular Front for the Liberation of Palestine, a marxist-leninist, political and military organization, which its main goal is to transform the arab society into this ideology and has been the designated group to perform the attacks; we have the economic financing of different groups and organizations in addition to our own businesses. Fatah, a military-political institucion and principal component of the OLP is a consulting member of the International Socialist (IS); we consist of 3 political organs: the **National Palestine Council, (NPC)**, it works as the legislative body of the OLP, and is in charge of making decisions and of choosing the members of the executive committee. The **OLP Executive Committee (EC)** is the highest executive organ. Consists of 18 members chosen by the (NPC) that rule all of the OLP organizations and budget, it also covers different national and international affairs such as: military issues, international relations with the arab states, popular organizations, informacion, cultural approaches, administration, social, economical, financial, health and planification matters. And finally, the **Central Palestine Council (CPC)**, founded in 1973 as the consulting committee of the executive committee, it gathers every six months to discuss matters related to their organization.

We, will support and will fight for all that countries that are being oppressed by those imperialist world powers and that chose to encourage our legitimate fight for our people, his rights and our territory, because as our prophet Mohammed said ”*Support your brother if he is being oppressed.*“ Countries like Russia, DPRK, Irán, Sudán, Syria, China, Venezuela and Egypt that have show their fraternity to this fight will always be our brothers. To other countries that have give us the back, we would like to make them a meditation. A terrorist is the one that protect its people? Is the one that protect its land? In that case all the presents are terrorist and if you eradicated terrorist groups, then we also, of course, there will be some that should be eradicated faster than others for example Israel or the United States, because, as you say they lead our list.

Some members present today must be asking why we made this attacks, the reason, the resolution 67/19 of the General Assembly. Where the admission of Palestine was present as an observer State and not member of the Organization. Years ago, Mahmoud Abbas requested the entry of Palestine as a member with every right in the United Nations. However, the Palestine 194 initiative to be recognized as a member state of the Organization was never put to vote by the Security Council, an indispensable requirement for membership.

This request did not seek to legitimize a country created many years ago but to save the peace process, the independence and sovereignty of the Palestinian State and the right of return of the refugees. Because unlike other organizations, the OLP was created by the collective will of our people, and not by a movement or party.

As we said before we are tired of this oppression and of seeing how countries that are famous for the struggle for human rights give us the back, countries like Germany, Australia, South Korea, Estonia,

the Netherlands, the United Kingdom and Nigeria that abstained, have show with their silence their support to these oppressors (Canada, United States, Israel, Marshall Islands, Micronesia, and Panama). To them we said the same thing that prophet Mohammed said to us “*Prevent others from committing injustice, because that is how you support them*” that is what we will do to each of you.

As a key part of this press release we want to give complete security to those countries such as Russia, China, Venezuela, Egypt, Afghanistan, Yemen, Somalia, Libya, Myanmar, Saudi Arabia, Turquia Cuba, Ecuador, Spain, Iraq, Iran, Italy, Japan, and Pakistan that have support us, that nothing will happen to its population and territory, and would have the complete support of this organization in future national and international actions.

We consider that this is something the world should not take lightly and instead, start to take action, the clock is ticking and when it ends, it will not be a good surprise, and always remember every action has it consequence.

Representatives of the Organization for the Liberation of Palestine
