

ECOSOC

The day begins with the alliance of the all the delegations that compose the committee, except for the delegations of Israel, Democratic People's Republic of Korea and Colombia.

The alliance is composed of three points. First, there needs to be a way cut down the economical resources of the terrorist groups in order to stop the provisioning of guns and illegal armament, this way terrorist groups will not have the same power they used to to create attacks on important cities and find the way of not getting caught. Furthermore, the second point of the agreement is to prevent and track the activities of the terrorists, so that they can get caught before they carry out the attack, this ways more lives can be saved and criminals can pay for the lives that they have taken, in this context, they are all planning who to sanction the terrorists, both criminally and financially. Lastly, the last point of the alliance is to invest in education, so there are fewer people that join this kind of groups; to improve the health system for the victims and assure them an opportunity for recovering the lifestyle they used to have before they became victims.
